IQspiro

In the United States, a patient dies from COPD every four minutes. It's the fourth leading cause of death, with 24 million people estimated to have the disease and 12 million of those undiagnosed.

The IQspiro™ Digital Spirometry System makes detection at the primary care level simple and effective.

SIMPLE & EFFECTIVE IN-OFFICE TESTING

IQspiro™ Digital Spirometry System

The IQspiro™ from Midmark combines a digital spirometer with a Windows® based software solution that makes it fast and easy to capture, interpret and review patient test information.

- Accurate and reliable – meets or exceeds ATS 2005 Standards

- Easy grasp, lightweight design makes testing comfortable for adult or pediatric patients

- Ergonomic, T-shaped design promotes correct patient positioning during testing

- Unique eject lever alleviates handling of used mouthpieces

- Easy-latch door design improves mouthpiece stability and protection

- USB connection requires no battery to operate

- View real-time Flow/Volume Loop and Volume/Time graphs with fully customizable parameters

- Pre- and post-bronchodilator testing with automatic interpretation

- Trend patient's test measurements over time in graphical and tabular formats

- Easy to print full page reports on standard paper

- Use with today's top EHR/EMR systems or as a standalone device with IQmanager™

Save test results directly to patients' electronic records. Visit the Technical Support page on midmark.com for a complete list of our EHR/EMR partners.

Increase efficiency and improve patient care within your existing workflow

The speed, accuracy and ease of use make the IQspiro™ a cost-effective device for detecting and managing pulmonary disease – but the benefits don't end there. Talk to a Midmark representative today to see how effective and economical it can be to add spirometry testing to your patient care strategy whether you're a single practitioner or part of a larger physician group.

1 Preparing the test is as easy as retrieving the patient data from the EHR system or IQmanager™ software.

2 Patient coaching is made easier with a choice of easy-to-see incentives on full screen (image: candles).

3 Avoid contact of used mouthpieces during disposal while test results are being saved directly to the patient's records.

4 Detailed test results with auto interpretation help clinician diagnose patient's lung health accurately.
