New Data Shows Clinicians are Negatively Impacted by the Requirements of Getting Patients Their Specialty Medications

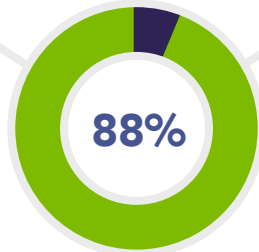

- 📍 Difficulty tracking specialty Rx status
- ✅ Obtaining prior authorization

- 📄 Obtaining the correct enrollment form(s)
- ✍️ Manually filling out paper documentation

💬 Phone calls and faxes back and forth

💰 Understanding patients' out-of-pocket costs

A COMPLEX PROCESS

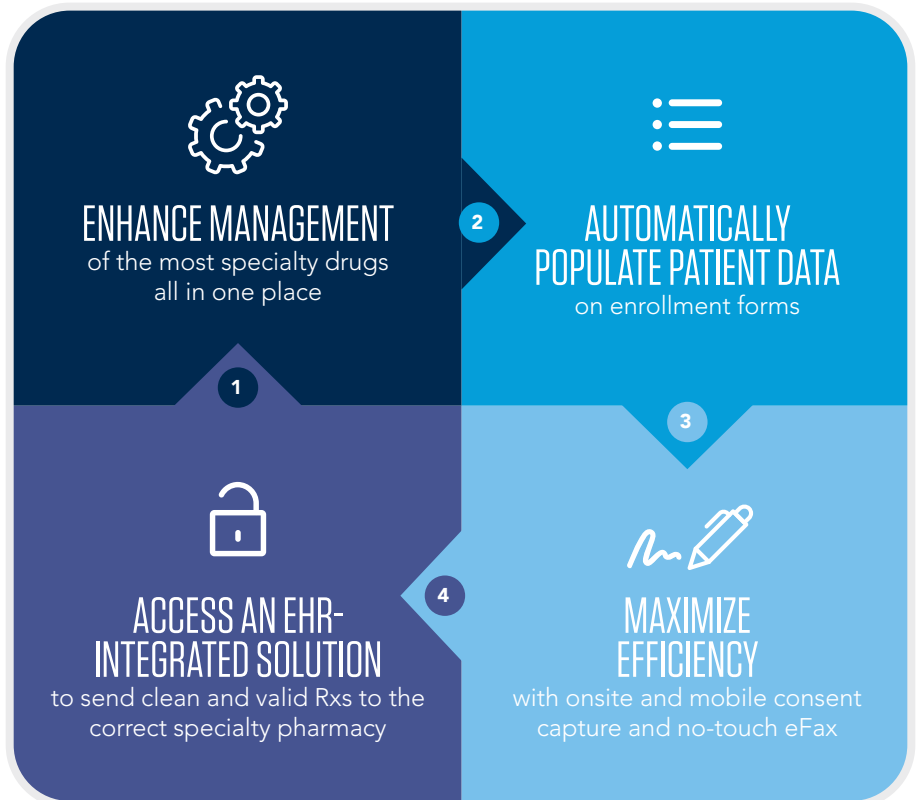

Though they account for only about 3% of all the prescriptions written in the U.S., in 2020, specialty medications are expected to represent as much as 50% of total prescription cost.

Physician respondents from a recent survey of physicians¹ attribute negative impacts on their practice from prescribing specialty medications.

A New Solution to a Growing Challenge—Focused on Supporting Patients

AccelRx is a next-generation solution that delivers a single, automated, comprehensive platform to help clinicians streamline specialty medication fulfillment for patients.

An end-to-end solution directly integrated into the EHR, AccelRx facilitates clinicians to efficiently and accurately complete the information required to successfully manage the fulfillment process for specialty medication prescriptions.

AccelRx can help you reduce time to fulfillment for your specialty medication patients, improve specialty medication adherence, and drive improved patient and staff satisfaction.
