**READMISSION
PREVENTION**

**PQRS QCDR
REPORTING**

Patient Engagement tools make the intake process more efficient and focused on increased patient satisfaction.

Document Management system turns a large administrative burden into a simple one-touch process.

Patient Readiness Tracking Board and Clinical Decision Checklists help ensure patients are optimized and delays and cancellations are avoided.

Surgical CDI™ Clinical Documentation Integrity provides a proven way to ensure accurate coding, leading to appropriate associated reimbursement and quality scores.

Readmission Prevention module flags and tracks high-risk patients to ensure follow-up is complete while enabling a full transitional care management platform.

PQRS QCDR Reporting platform is provided along with a complete quality analytics solution. Outcomes are tracked, and reporting tools measure compliance across the entire perioperative continuum.
